
13 章

1.

```
package pass13_01;
public class Denpyo {
    String date;
    String item;
    int price;
    int number;
    public void disp(){
        System.out.println(date + "/" + item + "/" + price + "/" + number);
    }
}
```

2.

```
package pass13_01;
public class Exec {
    public static void main(String[] args) {
        Denpyo denpyo1 = new Denpyo();
        denpyo1.date = "01-15";
        denpyo1.item = "パソコン";
        denpyo1.price = 50000;
        denpyo1.number = 1;

        Denpyo denpyo2 = new Denpyo();
        denpyo2.date = "01-16";
        denpyo2.item = "コピー用紙";
        denpyo2.price = 600;
        denpyo2.number = 5;

        denpyo1.disp();
        denpyo2.disp();
    }
}
```
